Editor's Notes

The Spring Show has been and gone and is now confined to history. What an excellent event it was. It is hard to believe that next year's 'Spring Show' will be the biggest event Rockhampton Orchid Society has held yet, with the Sub Tropical Orchid Council 'Rocky Round Up' Conference and Show taking its place. This year's attendance was excellent and every opportunity was taken to promote next year's conference with many enquires made by members of the public. There was also a lot of media interest with the event making local television news and an excellent article in The Morning Bulletin after the Show which showcased the forthcoming conference as an example of the opportunities to promote the Rockhampton region. A number of local politicians and councillors also attended and the opportunity to highlight the conference was again not lost with a pledge of further and ongoing support coming from councillor Neil Fisher through the Rockhampton Regional Council. The Show results are included in this Newsletter.

It may come as a surprise to many members that ROSI was a trend setter with the idea of orchid-conferences. When reflecting on my long association with ROSI, I realised I have served as a committee member for an unbroken 30 years in one position or another, from 1988. Some might say too long; but I am not engaging in self-aggrandisement; however, with this level of continuity I can recall the 'Orchid-Dalliances' of the eighties and nineties when presidents Greg Williams and Rod Elder were at the helm. These 'conferences' were always well attended by kindred societies and enthusiastically embraced by all members of the society. Likewise, was the last conference 'Orchid Extravaganza' held in the mid-nineties with John Alexander as president; who I and other members caught up with at the Show. All were held in a mixture of locations, some in the Leichardt Hotel and even the Custom's House was pressed into service on one occasion with the dinner having to be held in the largest function room at the Rocky-Leagues Club. At this event the prize-money for champion orchid was \$1000, sponsored by The Rock Building Society and won by Beryl Robinson from Robertson's Orchids Woombye with a *paphiopedilum*.

Recently, along with a number committee members I attended the Rockhampton Regional Council's 'Tropicana' at the Botanic Gardens. The RRC have really got on board with all things 'gardening' and 'sustainability'. This was the third event; and I am happy to say that it has improved each year. While we didn't have a presence in the form of a display unlike the previous two years, I gave a talk on 'Native Orchids of the Rockhampton Region', and we had several specimens to show the attendees. Overall, we were very well received and of course we didn't miss the chance to again push the conference with local councillors and many leaflets were distributed amongst the crowd. In addition, President Jeff Bloxsom gave a short spiel on what orchid enthusiasts and the public can expect at the conference.

Until next month, happy growing, Jeff Glover

Growers' Tip

Fertilizer in general is a contentious issue for orchid growers and considering it's the start of growing season I thought a review of the basics might be in order. A general rule to keep in mind is that you use a higher N, Nitrogen for growth (in Spring -Summer) and a lower level N for flowering (Autumn -Winter). An N P K ratio is often quoted which indicates the relative content of the main nutrients or essential elements contained in the fertilizer. Nitrogen (N), Phosphorus (P), and Potassium (K), Other components such as Calcium, Iron and Manganese may be also present. 'Types' of fertilizers for orchid growers can be grouped into three basic groups 1. Water Soluble (granular) 2. Foliar (liquid) 3. Organic (Fish/Seaweed extracts, Liquid) All have their devotees and many growers use a mixture of the different types on their plants with varying results. All genera respond differently to fertilizer application and it is always a balance to get flowers rather than 'growing leaves'. Do your research there is a vast amount on the internet. Work around more or less Nitrogen and you shouldn't go wrong.

R.O.S.I Growers Group Report

On Saturday October 6, 43 members met at Keith and Pam Marsden's residence in North Rockhampton. Thanks go to Keith and Pam for inviting us. The yard was immaculate and we had plenty of shade thanks to Keith and his helpers who erected the Club's shades, and of course the large tree that dominates part of the yard. There was much to see in the Orchid house. *Den. aphyllum* was flowering beautifully but sadly had not been out for the show.

Later, Keith drew our attention to a large specimen of a flowering *Den. keithii*.

I presented a small segment about *Vl. plantifolia*. Our vanilla vine has begun flowering and Trevor has been endeavouring to pollinate the flowers. The vine had been a gift from Keith some years ago.

Keith demonstrated the repotting of soft cane dendrobiums and the removal of and potting of keikis. There were several newish members who hopefully gained from Keith's demonstration.

As usual, thank you to the members who donated to the raffle table and the ever-generous Keith handed out small soft canes after the raffle to those who didn't win a prize. Everyone left with a plant.

President Jeff gave a brief report on our Spring Show and thanked members for their help and support.

Our next Grower's Group will be held on Saturday October 27 at 2pm, at the residence of Leone and Darryl Humble at 9 Bells Court Rosslyn, Yeppoon. Remember to bring the usual- chairs, plate of food to share for afternoon tea and hat. This will be our last Growers Group gathering for 2018. On the homeward journey, members are invited to drop by our house at **16 Flinders Close, Lammermoor** (if interested). We still have a lot of *Phalaenopsis* flowering. If members are feeling energetic, I also recommend that they visit the Wreck Point Look Out which is close to our place. The new viewing platform is positioned immediately above the cliff face. Worth a look!

Species of the Month

The species of the month is *Den. lindleyi* known by many older growers by its synonym, *Dendrobium aggregatum*. Many plants are seen gracing the showbench at this time of year and our recent Spring Show was no exception. It readily grows into a major specimen. Unfortunately, like all 'Indian Type' dendrobiums, the group to which it belongs; it has a relatively short flowering period usually around 2-3 weeks from when the first flowers open to the last. Its masses of rich yellow-gold flowers make a beautiful display heralding the arrival of Spring for many Orchid enthusiasts. A lot of these plants are grown outside in a sheltered position in dappled light such as, under a suitable tree. Once reaching specimen size it has a propensity to grow its own 'basket,' with many

growing points forming a dense mass. It is widespread across Asia, from Bhutan in the Western Himalayan foothills through SE Asia and SW China. Many have been awarded, the majority being cultural awards. There are two recognized varieties which are *Den. lindleyi* var *majus* and *Den. lindleyi* var *jenkensii*, the former having larger flowers and the latter smaller flowers and a smaller growth habit. It likes a rest over Winter, so cut back on water and fertilizer. Overall, easy to grow and a must for your collection or garden, or even just to impress visitors and neighbours.

General Cultural Guide October/December

<i>* Information is general in nature and given in good faith.</i>	Watering/Weekly	Fertilizer Twice Weekly	Pest/Disease Control	Comments
Cattleya	2-3times weekly	Higher Nitrogen	Inspect for mealy bugs/Fungus control if necessary	Increase watering frequency as temperature rises to maintain humidity. Divide and re-pot mature plants
Dendrobium Hard cane	2-3times weekly	Increase fertilizer containing a higher nitrogen level.	Inspect for mealy bugs and scale /Fungus control if necessary	Increase watering frequency as temperature rises to maintain humidity. Re-pot if overgrowing pot
Dendrobium Softcane	2-3times weekly	Increase fertilizer containing a higher nitrogen level.	Inspect for scale Spray with white oil, Malathion	Remove and pot on Kiekies (plantlets)
Phalaenopsis	1-2 times weekly	Increase fertilizer containing a higher nitrogen level	Use Preventative Fungicide Mancozeb	Increase watering frequency as temperature rises to maintain humidity. Re-pot if overgrowing the pot. Pot up seedlings.
Vandaceous	Water daily in hot weather every 2 nd day if cooler	Increase fertilizer containing a higher nitrogen level	Ants / Scale and Mealy bugs. Inspect material in baskets. Spray with white oil, Malathion	Increase watering to once a day in very hot weather. Maintain humidity when possible.
Oncidium	In hot weather, every 1-2 weekly	Balanced fertilizer.	Fungal leaf-issues as humidity increases.	High nitrogen fertilizers encourage too much leaf growth in Varicosum types
Paphiopedilums	3 times weekly more if in hot weather.	Balanced (Less nitrogen) fertilizer	Preventative Fungicide Mancozeb	Do not let plants dry out in hot weather.
Catasetinae	At least 3 time weekly Increase frequency If new growths are starting	Increase fertilizer containing a higher nitrogen level	Spray Miticide monthly, more often in Hot dry conditions	Maintain a close vigil for Spider mites. These pests can devastate a collection.

Next Monthly Meeting: Tuesday 23rd October. Starts 7.30 pm.

Judging News

Terry Dean with his Champion of Show. *Paph. rothschildianum* 'Ellie' HCC/AOC.

With the Show just passed, I thought it was timely for an explanation of the judging processes considering we recently have had many new members, and also for some of those members of the society who may have a misunderstanding of the judging processes.

Terry's plant was collectively vetted for an AOC award by the Judging Panel (11 Judges, 4 Associate Judges) and as is always the case and has always been at our Shows, consideration was also given to the Reserve Champion Orchid. Likewise, as is any other 'quality or cultural' exhibit, such as, a third preference or Best Specimen that any judge deems worthy of **nomination** for **Award-Assessment (not an automatic process as some mistakenly believe)**.

However, in the case of Showbench Judging, to select the major show prizes, plants are taken from Class Champions, (refer to the schedule), the panel will also collectively then vet each nomination as to whether it will stay on the judging bench. In this Show's case three plants remained after vetting. Votes were then taken; excluding any judge who had an interest in any of the 3 exhibits. As a result, Terry's plant was voted by majority as Champion of the Show. The Reserve Champion was then selected by voting from the remaining two plants. After the show bench judging was completed, Terry's plant was then also **nominated** by several judges as worthy to be further assessed for an Australian Orchid Council quality award. By panel consensus the award assessment proceeded and resulted in it being elevated to the higher award of Award of Merit (AM, pending). It had increased its flower count from 3 to 4 when it was awarded an HCC as Champion Orchid at the 2016 Spring Show. In addition, it was now also comparable to other plants that had received this standard of award.

The Reserve Champion was also then **nominated** by several judges as being worthy of assessment for a quality award. However, already being an awarded mericlone meant the owners would be unable to apply their own cultivar name as in Terry's plant's case, which was a seedling and also as this clone *Van. Pine Rivers* 'Wasana' has previously been awarded many times, the offer was declined. It is worth noting for members not familiar with the Judging Rules and procedures, it is always remains the prerogative of the owner to have the plant assessed for an AOC quality or cultural award. For whatever reason they can accept or decline, keeping in mind that a cost currently \$38.50 is incurred.

Thanks go to Mel Wheeler, immediate past STOC Registrar who acted as the Panel Chairman (usually the job of the highest-ranking judge present, Registrar or Assistant Registrar), for the Champions' selection and awarding processes. This is a common occurrence, as under the Australian Orchid Council rules judges who have an interest in either judging process Showbench or Award, (i.e. either own or are acting on behalf of the owner) must absent themselves from the assessment. It was necessary in this case as two plants out of the 3 selected were owned by judges. Likewise, Terry was also precluded from the Award assessment. Thanks to all judges and associates who attended and volunteered their time, (sometimes a thankless task,) and to those who travelled at their own expense, especially Mel and Judy Wheeler from Brisbane, John Hughes from Bundaberg who has supported both of our shows for many years, and our Gladstone compatriots, Frank Mollenhauer, Len Dowling, Jennifer Scott, and Richard Cornale. Thanks also those members who acted as Stewards for the Show. 36

Jeff Glover,
Assistant Registrar, Northern Area Panel Sub-Tropical Orchid Council

Support from The Morning Bulletin

President Jeff Bloxsom has secured support for an advertising promotion from the Morning Bulletin for the conference through the newspaper's community support program. It will be in the form of three advertisements this year and three next year as the conference draws closer. After much toiling, our webmaster and designer 'extraordinaire' Bob Lakey has again come up with a beautiful poster/add which is shown below. Keep an eye out for them, the first should be in a paper sometime this month.
